

Dredging of Gold Tailings Dam (WA) (HDPE Lined Pond)

Material Pumped	Gold Tailings
------------------------	----------------------

Depth Pumped	1-5 m
---------------------	--------------

Pump Capacity	4000 L/min (clear water)
----------------------	-------------------------------------

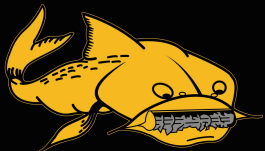

Slurry Ratio	15%
---------------------	------------

Slurry Pumping Flow Rate	202 m³/ hr
-------------------------------------	------------------------------

Average slurry extraction	1617 m³/day*
--------------------------------------	--------------------------------

Average wet solid extraction	242 m³/day*
---	-------------------------------

Pumping Distance	180 m
-------------------------	--------------
