HUESKER Group commences production in Russia

Investments set to expand business potential and strengthen labour market

HUESKER Russia officially inaugurated its first production site on 29 March in the Russian town of Klin, some 80 km north-west of Moscow.

Having established the Russian subsidiary in 2013, the HUESKER Group, one of the world's leading geosynthetics manufacturers, had already underlined its commitment to stepping up business activities in Eastern Europe. "We believe there is even greater potential for our products and system solutions in the Russian market," explains HUESKER Group Managing Director Dr. F.- Hans Grandin. "Particularly in the roads and pavements segment, but also in the field of earthworks and foundations as well as hydraulic and environmental engineering, we have completed a number of very successful projects in the last few years. The ability to manufacture many of our products locally will now enable us to respond even more quickly and flexibly to individual, project-specific requirements."

The products now manufactured at the new, approx. 5,000 m² factory include tried-and tested geotextiles such as HaTelit, Basetrac and Stabilenka. Accompanied by Stanislav Khmel'nitskiy, Managing Director of HUESKER Russia, and Alyona Sokolskaya,

Mayor of the town of Klin, Grandin formally kicked off the inauguration festivities with the symbolic tape-cutting ceremony.

As Sokolskaya sees it, the new plant will provide a welcome boost for her town. "We are glad that foreign investment is continuing to flow into the economy of the surrounding area. What's more, this is a unique chance for the whole region to raise the standard of its roadbuilding."

"We look forward to exploiting our know-how, amassed over a period of 155 years, in tackling many more intriguing projects," adds Grandin. "We are confident of being able to overcome the various challenges that we are certain to face along the way."

About the HUESKER Group

The HUESKER Group is one of the world's leading manufacturers of geosynthetics and technical textiles. The corporate head office of the HUESKER Group is located in Gescher (Westphalia), Germany.

As a globally active company, the Group has ten subsidiaries and cooperates closely with trading and distribution partners in more than 60 countries. HUESKER has been shaping international markets as a pioneer of textile weaving for over 150 years. The HUESKER Group substitutes conventional massive construction with sustainable and intelligent solutions based on modern, high-performance technical textiles. With its products and services, HUESKER provides solutions in the fields of earthworks and foundations, roads and pavements, environmental engineering, hydraulic engineering and mining as well as various applications for industry and agriculture.

First-class engineering services, in-depth expertise in the manufacture, coating and customisation of technical textiles, and an innovative spirit are the key to HUESKER's success. If a project is challenging, HUESKER will find a solution.

You are welcome to contact us if you have any further questions.
