

ASTM is the accepted standards organisation for all building materials worldwide.

ASTM classifies Cortex as a: Geosynthetic Cementitious Composite Mat (GCCM)

GCCM Definition:

“A factory assembled barrier consisting of a cementitious material layer contained within a layer or layers of geosynthetic materials. The GCCM forms a hardened barrier after hydration.”

ASTM WK49618

New Practice for Sample Preparation for Geosynthetic Cementitious Composite Mat(GCCM)

Designation: D8030/D8030M – 16
