

Dear Industry Colleagues,

At each Geosynthetic conference we have held an informal meeting of Association executives and their respective Chairs or Presidents to exchange ideas, discuss our activities and find ways to work together. I would like to organize another meeting of this nature for the Geosynthetics conference this February 11-13, 2019 in Houston, TX. We generally meet for 1.0 – 1.5 hour. Each organization will give a five minute (or less) summary of what their group is working on. From there, the organizations can look for ways to work together or support each other. Many fruitful alliances have come from previous meetings. I have expanded the group of invitees to include some new groups.

In speaking with Tim Stark at FGI, we thought that Monday, February 11, 2019 during the lunch hour might work the best for a meeting of this type. Would this time work for the majority of people here? If not, please let me know the dates/times that would work for you.

I know some organizations hold year-end elections. If there is a change in your leadership, kindly forward this email to the new representatives. I have invited the organizations listed below. If I missed anyone, I apologize. Kindly let me know who to contact and I will send them an invitation.

Fabricated Geomembrane Institute (FGI), Rippling Waters Orphanage, Geosynthetic Materials Association (GMA), Geosynthetic Institute (GRI), IGS-North America, International Geosynthetics Society (IGS), International Association of Geosynthetic Installers (IAGI); Erosion Control Technology Council (ECTC); Geosynthetic News Alerts (GNA), geosynthetica.net, Geosynthetics magazine, and last but not least – the man from around the world, Boyd Ramsey. I included Boyd as he works with many organizations from around the world and he has great insight.

Jonathan – please forward this to Keith Gardner – I don't have his address.

Bob – please forward this to George

Warmest Regards,

Laurie L. Honnigford
