### SPECIALISTS IN POLYETHYLENE

C2H Piping Services supplies specialist polyethylene pipe fittings and services for various industrial applications. They are passionate about delivering a world class service experience to the Australian market.

Their products and services are used throughout Queensland in the transmission of water, sewerage, gas and chemicals.

C2H Piping Services prides itself in being able to provide a comprehensive range of electro fusion and spigot fittings. All their products are pressure rated and internationally accredited, and sourced exclusively from world class manufacturers.

They are also an approved distributor of electrofusion and butt fusion welding equipment. They have partnered with leading Australian companies to bring only the best and most robust hire equipment to the local market.

Their aim is to offer a quality service to their clients, ensuring that they exceed their expectations in terms of the 'service experience'. They operate with the belief that their business succeeds only when their clients succeed.

## PROJECT SERVICES

C2H Piping Services delivers capability, experience, integrity and a safety focused culture which assures the most comprehensive service in the polyethylene industry.

Embracing their TRI-SERVICE business model of product distribution, equipment sales/hire and fully networked project solutions ensures they can rapidly adapt to client project requirements. They provide a full project scope ability through; selected planning, construction and commissioning aspects. Their adaptability provides confidence with a safe, efficient response to project and industry needs. Partnering with C2H's services ensures that their customers always have technical and service support where and when they need it most – locally.

## POLYETHYLENE AT ITS BEST

C2H Piping Services through its TRI-SERVICE model can offer the full package. A fully networked solution requires flexibility, standardised componentry, high quality production techniques.

Products:

*Electrofusion* provides an easy solution to on site fabrication in tight areas, repairs and tie-in requirements.

- Straight Couplings (4mm & 4.7mm pins)
- Multiseal tapping Tee
- End Caps
- Flex Tee
- Reducers
- Branch Saddle
- Elbows 90° 45° & 22.5°
- Transition Couplers
- Equal tees
- Transition Elbows
- Reduced Tee

*Spigot* fittings give the ultimate flexibility in designing and constructed networked solutions. Vertical and horizontal alignment changes plus pressure and size transitions mean anything can be achieved.

- Elbows 90° 45° & 22.5° (Short & Long)
- Multi Bends
- Seamless Bends 90° 60° 45° 30° 22° & 11°
- Stub Flanges (Short & Long)
- Equal Tees
- Reducing Tees
- Angle Branch Tees 45°
- End Caps
- Reducers (Eccentric/Concentric/Long/Short)
- Stepped Reducers
