

The background of the entire image is an aerial photograph showing a large-scale construction project. The ground is covered with a grid of interlocking, light-colored concrete matting. The matting consists of rectangular blocks with raised, rounded edges that fit together like a puzzle. The perspective is from directly above, looking down on the installation. The lighting creates strong shadows, emphasizing the three-dimensional structure of the matting. In the upper portion of the image, a semi-transparent dark grey rectangular box contains white text. In the lower center, another semi-transparent dark grey rectangular box contains the Earthlok logo and tagline.

# EARTHLOK Delivers Drainage Project for Sydney Water to Combat Severe Erosion Along Water Pipeline

*Original  
concrete flume  
drain washed  
away causing  
severe erosion  
(see over)*
