

2020 GEOMEMBRANE WORKSHOP SERIES

MELBOURNE & BRISBANE WITH BOYD RAMSEY

MARCH 2020

ACIGS is pleased to announce two days of lectures focused on Geomembranes. The event is held in Melbourne & Brisbane, with Boyd Ramsey as the keynote lecturer. Delegates can attend either or both days of each workshop.

DAY 1

DESIGNING, SPECIFYING & CONSTRUCTING WITH GEOMEMBRANES

A one-day workshop for professionals designing, specifying and constructing with geomembranes; covering the latest technical advancements:

- Overview of geomembranes and their applications
- Production & Supply
- Material properties and test methods
- Compliance and approval testing
- Specifying properties
- Design considerations
- Constructing with geomembranes

DAY 2

GEOMEMBRANE DURABILITY & CHEMICAL COMPATIBILITY

A one-day workshop covering a range of topics related to durability and chemical compatibility including:

- Characterising and modelling durability and chemical compatibility
- New accelerated durability test methods
- Developments and revisions to current evaluation methods
- New advances and material formulations
- Project specific materials testing

The seminars include a networking lunch.
