

TESTING TECHNICIAN

Job description

About us

Geotest, established and Incorporated in the state of South Australia, is currently the largest CQA and Independent Testing Company operating in Australasia, working with geomembrane installation companies, consulting engineers and principals providing services to assist with performance of installed geomembranes and electrical survey testing of geomembranes post installation throughout Australia.

About the Role

This is a great opportunity to be trained in Electrical Leak Location. We are seeking an enthusiastic person with an engineering background to join and support our team. Experience within the Geomembrane industry is not essential but we are looking for someone that has a strong desire to learn. While the position is based in South Australia there will be necessity to travel as work is local and interstate.

About the Candidate

Geotest are looking for candidates with:

- Strong analytical skills
- Strong mathematical skills
- Ability to write technical reports
- Good understanding of ASTM Standards
- Good understanding of OHS Standards
- Ability to build relationships and maintain rapport with clients
- Willingness to travel and work outside of South Australia on request
- Current Manual Drivers Licence
- White Card (Preferred but not essential)
- The right to work within Australia
