## To our Valued Customers and Suppliers,

We have changed our name from DDT Liners Australia [DDTLA] to **TENEEO**.

*Teneo* is Latin for containment .... quite simply it is just what we do.

As you can appreciate, as Environment Containment specialists, we no longer want to share a name with a toxic substance and our geographical reach is much further afield than our original base in Darling Downs, with offices now in Brisbane, Melbourne and Toowoomba.

The DDTLA name no longer adequately represents what we do and the sophistication we bring to the core of every job of containment. Our genesis was in a tarpaulin company back in 1983 on the Darling Downs. Over the years this evolved to Liners. A rapid growth in the LNG sector led to an amalgamation with Lining Tech, a market leader in Europe since 1997. Thus with the creation of the DDTLA group in 2014 we grew our Engineering and Landfill expertise whilst strengthening the capacity of the business.

Teneo better represents our core business and our capability to achieve containment across broader applications and industries.

At the core of the Teneo Group is our ability to contain – no matter the material – waste-water, brine, water, landfill, caustic, tailings and even prawns.

Only our name has changed.

For our valued customers and suppliers – our ABN, bank accounts details etc. are unchanged.

We are the **same** people, with the **same** approach – Quality, Safety and Efficiency – that made us a successful partner in the mining, energy, waste and water industries across Australia.

We are proud of the work we have done and our growth in recent years is testament to the trust given to our business. Visit our website to see recent projects and latest news – [www.teneogroup.com.au](http://www.teneogroup.com.au)

We thank you for your custom and trade and as we look forward to growing our relationship with you.

Yours sincerely

**TENEEO**

**Michael Walsh**
