Consultant at Large - Bulk Water
Utilities

About

A senior leader and highly experienced major projects delivery professional with an extensive background in the development and successful delivery of complex major infrastructure projects in the Energy, Resources and Water sectors. A diverse 35+ year career encompassing a wide variety of senior corporate, project delivery and operational leadership roles in major global organisations. Developed and led numerous high performing multi-functional teams.

Extensive international major projects experience, in-depth professional knowledge and strong interpersonal skills enabling the identification of solutions, resolution of challenges and the ability to inspire others to deliver successful business and personal development outcomes. Successfully designed and delivered business and project improvement transformation programmes, major project execution strategies and project intervention and recovery exercises on major capital projects and production operations around the world.

Through broad-based functional expertise, excellent general management skills and inspiring leadership, consistently able to make significant contributions to improvements in the safety and well being of others, develop effective strategic solutions, drive improved operating business and project delivery outcomes and lead the pursuit of excellence and certainty in delivery.
