NSW Public Works chooses Exclusive Anti Cracking Tiltex 12B for Erosion Control at Sewerage Treatment Plant

Tiltex Australia's Exclusive Tiltex 12B Anti Cracking GCCM has recently been installed at NSW Public works sewerage treatment plant at Bombala , NSW.

Tiltex 12B GCCM supplied in 5 metre wide rolls were laid to prevent erosion & rutting over clay batters when effluent levels varied and wave actions impacted upon the clay lined basin batters.

Tiltex 12B was chosen over traditional erosion control methods due to Tiltex B's 80MPa Compressive Strength & 16.1MPa Flexural Strength properties. 5 metre wide rolls making installation faster and streamlined with less material wastage and providing the client with a more sustainable material choice and economic alternative.

For more information on our exclusive Tiltex B range, visit www.tiltexaustralia.com.au to speak live to our team.
