

# Mine Rehabilitation at Hazelwood

AUGUST 2023

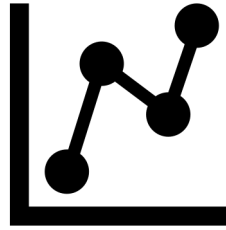

# EARTHLOK<sup>®</sup>

*flexible concrete matting*

**AUSTRALIAN MADE  
AND OWNED**

# Project Statistics

- Earthlok drain installed by Delta Group for Engie mine rehabilitation at Hazelwood, Vic. The drain is HDPE lined, 240m long x 12.5m wide (3240m<sup>2</sup>). Earthlok rolls were supplied at 5m wide by 13.5m long. Delta installed the entire drain in 1.5 days!!
- Earthlok replaced the original design of Reno mattress, saving weeks of construction time (in the region of 4-6 weeks) and costs. The installation of Earthlok over Reno mattress substantially reduces the carbon footprint and the overall environmental impact of the erosion solution.

**EARTHLOK**<sup>®</sup>

*flexible concrete matting*

*3 months later the adjoining slope are vegetated*
