

PRESS RELEASE

TILTEX MANUFACTURER EUROBENT'S APPEAL REJECTED - ORDER TO PAY €1,000,000 TO CONCRETE CANVAS UPHOLD

31ST MAY 2021

Eurobent Sp.z.o.o.'s appeal against the order of a Polish court to pay a compulsory sum of PLN 4,500,000 (€1,000,000) to Concrete Canvas Technology Ltd. has been rejected by the court of 2nd instance in Świdnica.

Eurobent is the manufacturer of Tiltex™ (a sand cement filled GCL marketed as a GCCM). Tiltex™ is also marketed by other companies under their own branding.

Pursuant to patent infringement proceedings instituted by Concrete Canvas Technology Ltd. against Eurobent in Poland for infringement of patent PL/EP 2027319, Eurobent has been restrained by preliminary injunction from manufacturing, offering and marketing for sale Tiltex™ in Poland since April 2018. The preliminary injunction remains in force.

Notwithstanding the preliminary injunction being in place, Concrete Canvas Technology Ltd. filed evidence of 21 instances of Eurobent ignoring the preliminary injunction by continuing to ship orders from its factory in Poland.

In its judgment of 11th February 2021, The District Court in Świdnica accepted most of Concrete Canvas Technology's evidence and held Eurobent to have violated the preliminary injunction on 18 occasions, ordering it to pay a substantial compulsory sum of PLN 4,500,000 (€1,000,000) to Concrete Canvas Technology Ltd. It was also notable that Eurobent refused to comply with an earlier court order to supply financial and other records. The District Court also found Eurobent's grounds for this further violation of a court order to be without merit. Eurobent appealed this order and the court of the 2nd Instance has rejected Eurobent's appeal. The decision is subject to appeal.

The main patent infringement action against Eurobent continues.

Concrete Canvas wish to reiterate that they will robustly seek to enforce their intellectual property rights where they are being infringed by a manufacturer, distributor or otherwise. Such enforcement will occur at a time and in a jurisdiction where Concrete Canvas can best accomplish its objectives. Patents exist to protect and encourage investment in innovation. It is in all of our interests to respect the law, including patent law.

ABOUT CONCRETE CANVAS

Concrete Canvas Ltd. was incorporated in the UK in 2005, it manufactures three award winning products, Concrete Canvas®, Concrete Canvas Shelters™ and CC Hydro™. These products were developed to exploit a unique material technology invented by Peter Brewin (MEng) and Will Crawford (MEng) whilst studying Industrial Design Engineering at Imperial College and the Royal College of Art in London.

Concrete Canvas Ltd's core material technology enables the supply of unique construction solutions that are extremely fast, easy to install and environmentally friendly. The company prides itself on innovation, quality and responsiveness to our customers' needs.

The primary markets for Concrete Canvas Ltd are in the civil infrastructure (road and rail), mining and petrochemical sectors where CC is used for erosion control applications such as channel lining, slope protection and bund lining. The company has grown rapidly since 2005 and has sold its products to over 80 countries around the world.
