

## CORRECTION - Combustible Cladding News on Torre dei Moro Post

CCN has removed from the CCN Australia September 2021 Volume 1 newsletter a link to an article entitled *"Officials Blame AlucoBond Flammable Cladding After Intense Milan High-Rise Blaze"*. That article incorrectly suggested that the Torre dei Moro fire incident in Milan was associated with the use of Alucobond®. We have become aware that Alucobond® was not the cladding material used on the Torre dei Moro in fact that cladding is now known to be Alucoil® (Spain) (see extract from Alucoil website below).
