Easy-Qote[®]

Elastomeric Coating Solutions

About Easy-Qote®

- Easy-Qote® is a unique polymeric cold applied self adhesive coating with excellent adhesion to ferrous, non-ferrous substrates and coatings
- Extensive field trials and laboratory testing over years for both offshore and onshore environments, have proven long term protection
- The benefits include minimum surface preparation requirements and easy application with no equipment required, in addition the ease of use in a confined space and working at heights.
- This success has led to numerous projects with applications on, towers (internal and external), baseplate protection, boat landings and handrailing on 100s of windmills globally. We look forward to this opening more doors for our coating repair patches as part of our renewable energy market developments.
