

HDPE GEOMEMBRANE TECHNICIANS

Geotest have an array of project opportunities upcoming in 2022 and are seeking motivated Technicians experienced in the installation and welding of Geomembrane liner to join and support our dynamic team.

While the position is based in South Australia you will be required to travel away from home for extended periods of time. Currently we are working on various sites located throughout South Australia, Queensland and Victoria.

The position/s are open for immediate start for the right applicant/s.

Qualifications and Licences:

- Proven experience in all aspects of Geomembrane lining installation including welding & QA-QC testing
- Current Australian manual drivers licence
- Construction Induction Safety Certificate (White Card)

Key Requirements:

- Able to work 10 hour shifts
- Able to work weekends
- Ability to take direction, follow instructions and work to timelines
- Able to work autonomously
- Able to work well in a team
- Demonstrate commitment to the safety of yourself and fellow workers
- Able to work on a Roster basis
- Be willing to travel and work outside of South Australia on request
- Position is an immediate start

Candidates must undertake medicals including drug & alcohol testing as per the requirements of client contracts.

Expressions of interest can be emailed directly to admin@geotest.net.au. Please submit a cover letter and resume outlining past work experience with references.
