INVITATION TO JOIN ASIAN GEOSYNTHETICS ASSOCIATION

AGA is a new trade association with a charter to represent the Asian geosynthetics industry.

AGA provides technical advice, publications, education, networking, business resources, industry support and advocacy. We work with members to provide access to quality assurance testing, raw material sourcing advice, preparation of product specifications and referrals throughout the production and sales cycle. We deliver timely and relevant industry content in weekly newsletters to help you stay informed about your marketplace.

BE INFORMED

All AGA members receive complimentary subscriptions to Geosynthetic News Australia (GNA), Geosynthetic News China (GNC), Geosynthetic News India (GNI) and e-publications and technical papers on geosynthetics in real time.

Years of technical research are available in our technical library and through contact with an in-house geosynthetic research expert. All ACA members will receive a complimentary copy of a practical handbook on geomembranes which covers the manufacture, use, installation and durability of liners.

ACA can assist with recommending quality systems, industry specifications and processes to upgrade the manufacturing capabilities of its members.

BE CONNECTED

Members can access a comprehensive global directory and geosynthetics industry database.

CHINA: TAIWAN: KOREA: MALAYSIA: THAILAND: INDONESIA: AUSTRALIA: NZ: INDIA: JAPAN

MEMBER BENEFITS

- Dissemination of Tools for Geosynthetics Education and Geosynthetics Training
- Access to In-house Technical Geosynthetic Library
- Real Time Reporting on Geosynthetic Products and Technologies
- Assistance with Preparation of Product Specification to Western Standards
- Assistance with Preparing Certificates of Conformity (CoC)
- Assistance with Formatting Product Data so they Conform to Australian Consulting Engineering Standards
- Supply of Templates and Proformas for Field Construction Quality Control and Construction Quality Assurance
- Assistance with Testing your Materials to Australian, ASTM and ISO Standards
- Assistance with Third-Party Certification of Asian-Made Products

COST

The annual membership fee is US\$500 per company.
