

*Announcing the Arrival of the Innovative™ '2000' GM
High-stability HDPE Geomembrane from Shandong
Innovative Material Technology (INNO Geosynthetics)*

A step change in stability for Chinese-made HDPE Geomembrane

The Innovative '2000' GM is made with certified raw materials such as premium Exxon-Mobil MDPE resin and a highly stabilized Cabot thermal and UV masterbatch.

Innovative '2000' GM derives its name from 1000 mins HP-OIT + 1000 hrs NCTL-SCR.

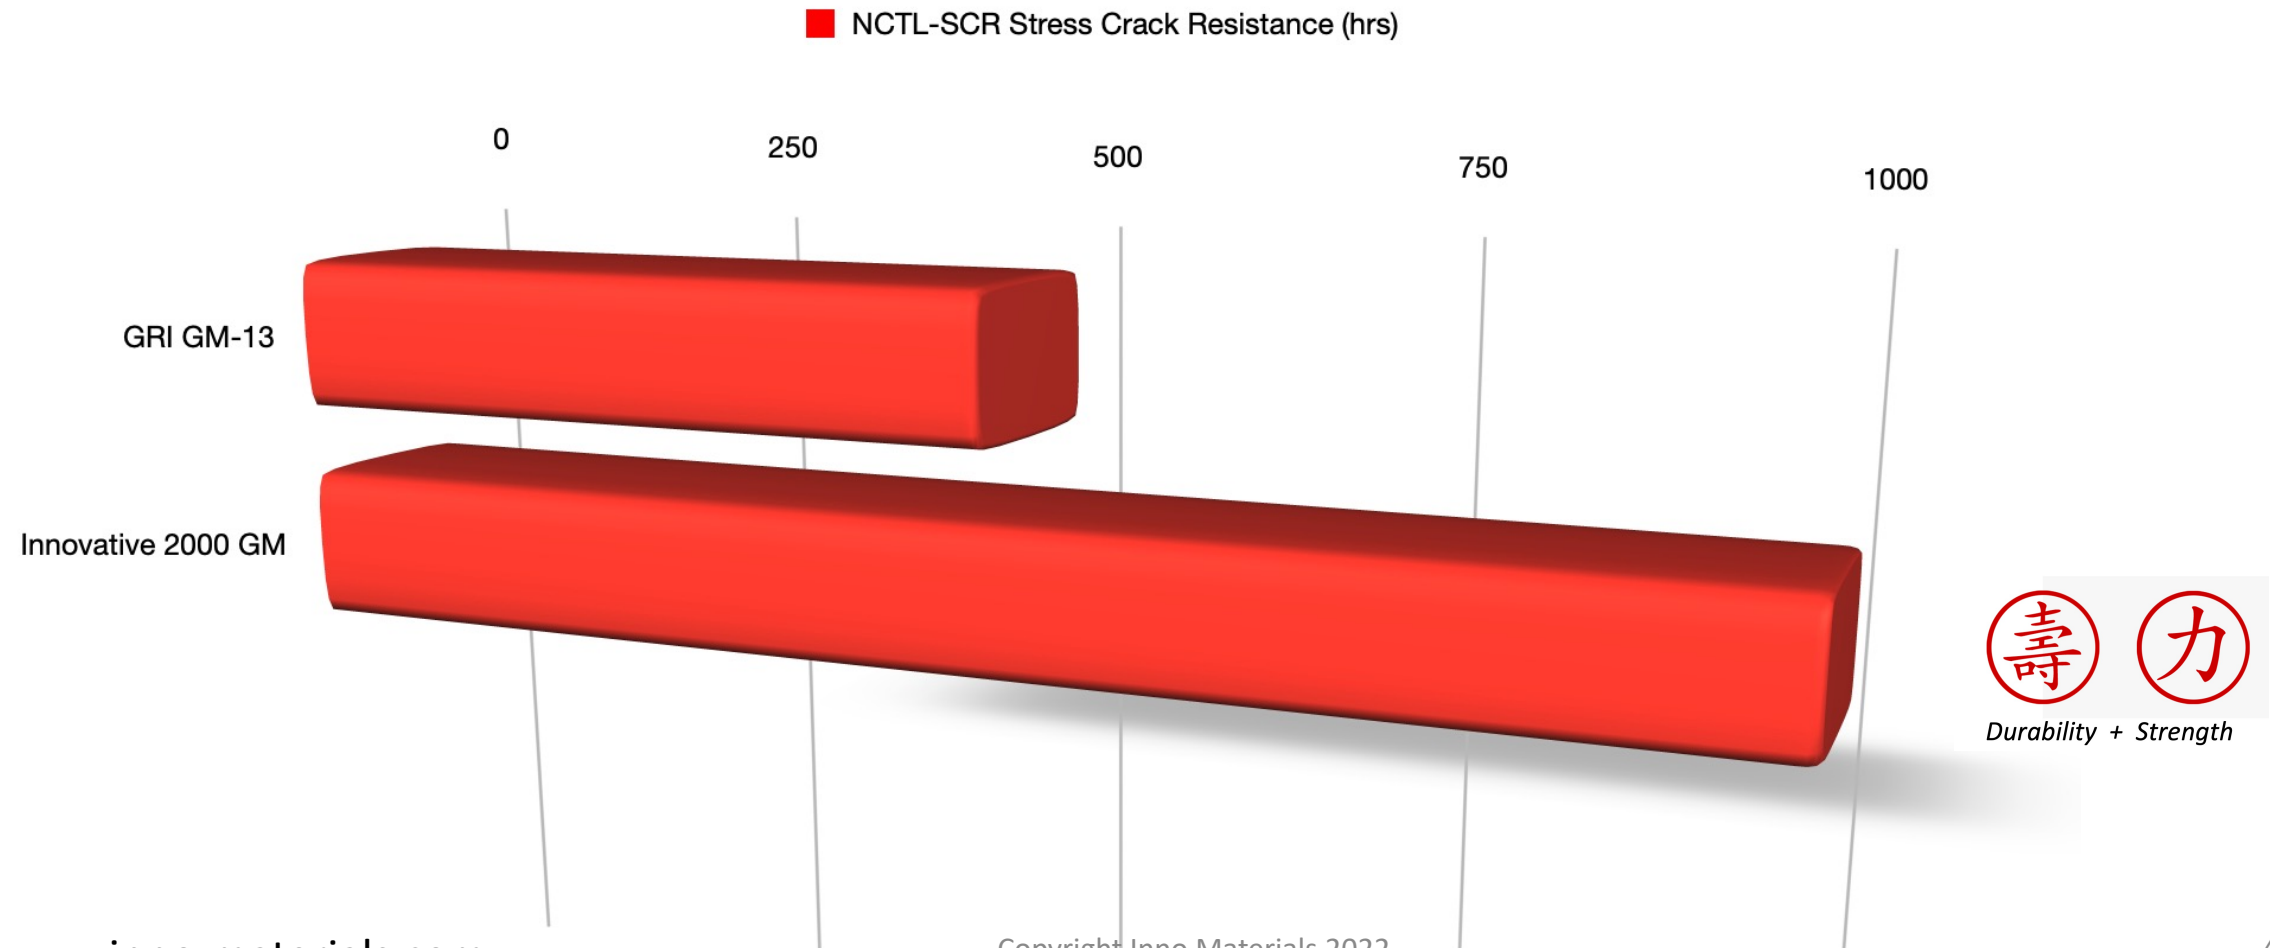

Unrivalled Performance

- Innovative '2000' GM derives its name from 1000 mins HP-OIT + 1000 hrs NCTL-SCR.
- The > 1000 hrs stress resistance is due to the MDPE resin from Exxon Mobil used for manufacture.
- The > 1000 mins HP-OIT is due to the high performance stabilizer masterbatch provided by Cabot

Stress Crack Performance You Can Count On

Long-Term Stability You Can Count On
